

## Hopi Health Care Center

Hopi Health Care Center is a health care facility built in 1999 on the Hopi Reservation in Northeast Arizona. In addition to outpatient clinics, there are 4 inpatient beds plus 2 birthing suites and 2 postpartum suites. The Hopi Health Care Center serves mostly Hopi and Navajo peoples. We do 35-70 births per year and are technically a birthing center as there are no operating facilities here. There are currently 3 full-time family practice doctors and one midwife doing deliveries.
